RAN Pipeline and House Bill Messaging

July 11, 2022

Pipeline infrastructure is a crucial element to make Marcellus Shale natural gas available to meet the growing energy demands domestically and internationally.

As featured in the Pittsburgh Business Times, Range CEO, Jeff Ventura, knows that the opportunity to utilize the Marcellus inventory and maximize the region's production relies heavily on critical infrastructure implementation.

Being able to expand access to Marcellus Shale natural gas would benefit Americans hurting from inflation.

"I think the country needs to fast track pipelines, fast track LNG facilities, fast track refineries in a safe and environmentally friendly way."

How can you help solve these energy issues? Take action!

PA House Bill 604 will help reform energy permitting in Pennsylvania and House Bill 2458 will establish a task force to begin the process of building out energy infrastructure right here in our state.
